

Need 1-2 volunteers for Laysan Island Restoration Project,
Papahānaumokuākea Marine National Monument. Late July 2009-
Mid Mar 2010

Proposed start date 20 Jul 2009.

This is a remote field assignment. The breakdown of work load is:
15% basic population monitoring of seabirds, shorebirds, landbirds
and plants using standard operating procedures (following detailed
written instructions is important so that data can be used for
population trend analysis); 20% endemic and endangered plant
propagation, outplanting and monitoring; 30% invasive plant removals
with Aquamaster (rodeo) and Garlon 3A herbicides; 15% camp
maintenance and 20% data entry, report writing and debriefing with
biologists and managers in Honolulu office after field season
completed. Laysan is a really remarkable place to work. We work
hard but are inspired by the wonders of nature all around us at
Laysan. The crew size on Laysan is a total of 4 people (2 Biological
Science Technicians and 2 volunteers). USFWS provides volunteers
with transportation (home to Laysan and return), housing, food and
clothing. **Please respond ASAP. Please send current resume
with current reference phone numbers to
cindy_rehkemper@fws.gov. No phone call please.**

CYNTHIA L. REHKEMPER
Biological Science Technician
